Notes
We are designing this website keeping 1280 x 800 pixils as our base.
This is the most common resoultion with designers' computers.

Approx 125 px get used up by the browser, we're work within the rest of the area.

Trasnparent black bar: 128 px

White bounding box: Height 512 px and width 860 px.
(for the **about me** and **resume** page the width box is a little narrow at 650 px but same height)

Approx 18 px of the background showing

The browser or the desktop will use up the rest of the space which would be another another 15-18 pix.
This complets our 800 px of our total height
